The Speaker announced the appointment of Mesars. Morrison, Harris and McKloley as conferees on the Fractional iGallop bill and of Mesars. Cobb. Vanj. Eaton and Payson on the Allen Landlord bil.

The Honse the I went into Committee of the Whole on the Sundry Civil Appropriation bill.

Mr. Herbert, of Alabama, sail that while the Sundry bill appropriated less than the bill of last year, the decrease was attributable to the fact that the Committee on Appropriations had surrendered jurisdiction over the items for the navy yards and the new naval observatory, maintaining that these items could be provided for in the regular Naval Appropriation bill. He contended, on the contrary, that the appropriation for the objects named should be made in the Sundry Civil Appropriation bill, which would then, instead of showing a decrease, exceed in the amount of appropriations the bill of last year.

Mr. Randall argued that the Naval Committee had proper jurisdiction over the Appropriations had surrendered incis-

mittee had proper jurisdiction over the subject of navy yards, but pointed out that even were they provided for in the pending measure the bill would still carry less money than that of last year.

What the State Officials Say. In connection with the feeling among

sleigh and carriage manufacturers that tured in the State Prison, the State officials made by hand, he machings, being used. which are bought trady micle, all the work from first to last, in Bath wood and from is done in the impsical calletul and thorough manner. This tends to re-trict the production to the lowest possible number. and the three or four hundred slet his and carriages made yearly at the prison form not more than five per cent of all the goods of the sort u-ed in the State. The warden and others in tarested declare that prices put upon the prison goods are such that they do not tend to reduce the wages of free laborers or the profits of private manufacturers. It is a frequent testimony that the prices of prison goods are so high that purchasers who prefer cheaper goods for less money go elsewhere. It seems to be the sentiment of those who manage the prison that the work is now managed in a manner to give the least possible trouble to private industry.

Scientists tell us that the tuber of the Purity and Strength and potato is not properly speaking, a root, but rather an underground stem, enlarged by the accumulation of starch, which is there stored up for future use. As the plant has been cultivated to generations with a view solely to the improvement of the tubers in size and numbers, the other parts of the plant savedim n shed. In the natural state the part of the plant above the ground is large and "igorous, while the tubers are small and faw; in cultivation the tuber has developed on such an extent that the sterrs are comparatively, weak, and many virieties do not flower and produce seed. This, it is claimed, i -Ul the reason that the old var eties that we knew 25 and 30 year, ago have deteriorated, so that they have gone cut of cultivation. No one knows anything about the "Mercer," the "Chenago" or the "Oxheart" of 30, or the "Orono" of 20 years

ago.'
One of the first experimenters in the lmprovement of the pointo was Rev. C. E. Goodrich, of Utica N. Y., as long ago as 1850. He became convinced that somebing was wrong with the potato, that it became delicate from constant cultivation and was, therefore, more susceptible to disease. In order to improve it, to give it nore vigor and hurdness, he procured, from its native hounts in South America, wild specificens of the posto (Solanum tuberosum,) and will these he conducted me of the most valuable experiments that ever have been made with this vegetable. As the first result of his experiments, he gave us the hardy and product ve "Garnet Chili," the name of which would give an indicat on of its origin, and HOLIDAY GOOLS, which is the progenitor of the still more PRITERES, FRAMES, DECO.

This variety seems now to be dee ining, and other seedlings of more re-cent introduction are taking as place; "The Beauty of Hebran," "Cark's No. 1," "Queen of the Valley," and "Bell," all seem at present to yield much belter; but, in a few years, if the theory of deterioratim (which would seem to be well established) is correct, must give way to new varieties. This method of hybridization and raising new seedlings has been of great benefit to farmers, wherever the potato is cultivated. - Tribune and Farmer.
